

Fillet and False Joint

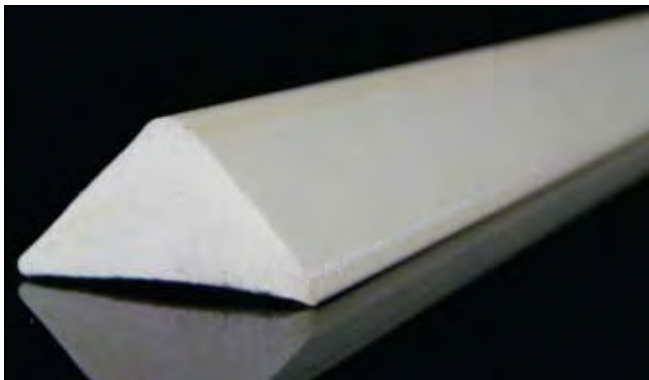

FILLET

Fillet Small Profile

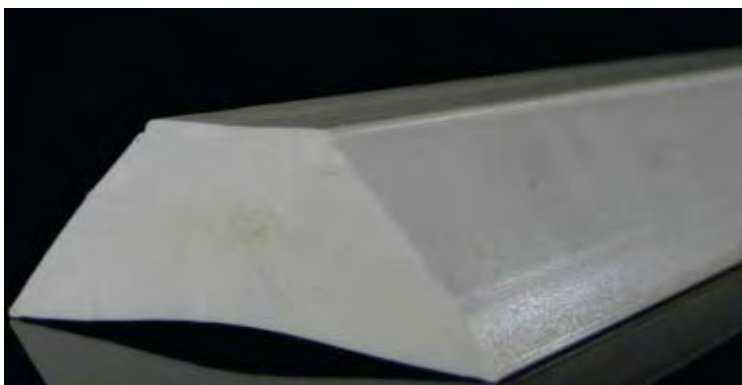

Available in a large or small profile, fillet is nailed or glued to formwork to create a neat chamfer on panel edges. The small profile is also available with the additional nailing tail or strip.

Fillet Large Profile

Ideal For:

- The panel industry

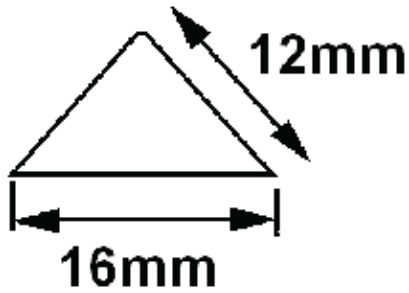

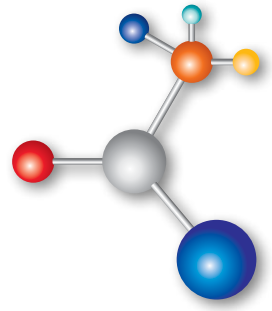

False Joint

FALSE JOINT

For architectural appearances the reusable False Joint (dummy joint) forms decorative joints in panels when casting.

For alternative construction profiles refer to [Feature Groove Page](#).
