

Tall Slab on Ground

Description

The Slab-on-Ground Barchairs has been designed as an economical, lightweight, easy to use alternative to metal chairs with bases in deep slab situations, with no voids under the bar or mesh and no rust problems.

The easy clip-on system ensures that the chair stays in place whilst the integral base saves time and labour placing separate bases.

The chairs have been load tested to exceed 500kg, and are available in 95, 100, 110, 120, 130, 140 and 150mm cover for bar or mesh up to 20mm.

Ideal for:

- Commercial and civil applications such as deep slab on ground, concrete roadways, soft sand buildings and Dowel Joints.

Tall Slab on Ground
